ONLINE SHOPPING WEBSITE

MANUAL TESTING — DEFECT REPORT

Prepared by: C. Swathi | Project: Online Shopping Website Manual Testing | Document version: 1.0

Purpose

This report records sample defects that may be identified while testing an online shopping website. The findings below are examples for project documentation; execute each test on your chosen website and update the Actual Result, Status, and evidence before presenting them as real defects.

Defect Summary

Total sample defects	High priority	Medium priority	Current sample status
7	5	2	Open — validate during execution

Detailed Defect Log

Defect ID	Module	Defect Title	Steps to Reproduce	Expected Result	Actual Result	Priority	Status
DEF-001	Login	Login accepts incorrect password	1. Open Login page. 2. Enter a registered email and incorrect password. 3. Click Login.	System should reject invalid credentials and show a clear error message.	Login succeeds even with an incorrect password. (Sample finding)	High	Open
DEF-002	Product Search	Search results do not match keyword	1. Open product listing. 2. Search for “laptop”. 3. Review displayed products.	Only relevant products matching the search keyword should be displayed.	Unrelated products appear in the results. (Sample finding)	Medium	Open
DEF-003	Product Details	Product price differs between listing and details	1. Note a product price on listing page. 2. Open its details page. 3. Compare prices.	The same product should show a consistent price on both pages.	Price shown on details page differs from listing price. (Sample finding)	High	Open
DEF-004	Add to Cart	Cart quantity does not update	1. Open a product page. 2. Click Add to Cart. 3. Open cart and increase quantity.	Cart quantity and subtotal should update correctly.	Quantity changes visually, but subtotal remains unchanged. (Sample finding)	High	Open
DEF-005	Checkout	Checkout proceeds with missing address	1. Add a product to cart. 2. Proceed to checkout. 3. Leave required address fields blank. 4. Click Place Order.	Required address fields should be validated and order submission should be blocked.	Order is submitted without a complete shipping address. (Sample finding)	High	Open
DEF-006	Cart	Remove item button does not remove product	1. Add a product to cart. 2. Open cart. 3. Click Remove beside the product.	Selected product should be removed and cart total recalculated.	Product remains in the cart and total is unchanged. (Sample finding)	Medium	Open
DEF-007	Logout	Back button reopens authenticated page after logout	1. Login successfully. 2. Click Logout. 3. Press browser Back button.	Protected pages should not be accessible after logout without logging in again.	Previously opened account page is displayed without re-authentication. (Sample finding)	High	Open

Defect Reporting Guidelines

• **Severity vs. Priority:** Severity describes the impact of the defect; priority describes how urgently it should be fixed. This sample report records priority only.

• **Status meanings:** Open = reported and awaiting review; In Progress = being fixed; Fixed = developer says it is fixed; Retest = ready for tester verification; Closed = retest passed; Reopened = issue persists.

• **Evidence:** Attach a screenshot or screen recording for every confirmed defect. Include browser/device, date, build/version, and test data where possible.

• **Before submission:** Do not claim these sample findings occurred on a real site unless you reproduced them. Replace sample actual results and status with your own test execution evidence.
