ONLINE SHOPPING WEBSITE

TEST SCENARIOS

Project: Online Shopping Website Manual Testing

Prepared by: C. Swathi

Total Test Scenarios: 53

Columns included: Scenario ID, Requirement ID, Module Name, Test Scenario Description and Priority.

Test Scenario Matrix

Scenario ID	Requirement ID	Module Name	Test Scenario Description	Priority
SC001	REQ001	Registration	Verify that a new customer can create an account using valid details.	High
SC002	REQ001	Registration	Verify required-field validation when all registration fields are empty.	High
SC003	REQ001	Registration	Verify validation for an invalid email address during registration.	High
SC004	REQ001	Registration	Verify the system prevents registration with an email address that is already registered.	High
SC005	REQ001	Registration	Verify a clear validation message appears when password and confirm password do not match.	Medium
SC006	REQ002	Login	Verify a registered customer can log in with valid credentials.	Critical
SC007	REQ002	Login	Verify login is rejected when the customer enters an incorrect password.	High
SC008	REQ002	Login	Verify login is rejected when the customer enters an unregistered email address.	High
SC009	REQ002	Login	Verify validation appears when the email field is left empty.	High
SC010	REQ002	Login	Verify validation appears when the password field is left empty.	High
SC011	REQ002	Login	Verify the Forgot Password feature allows a customer to request a password reset.	Medium
SC012	REQ003	Home / Navigation	Verify the online shopping website home page loads successfully.	High
SC013	REQ003	Home / Navigation	Verify clicking the website logo navigates the customer to the home page.	Low
SC014	REQ003	Home / Navigation	Verify each main navigation link opens its correct page.	Medium
SC015	REQ003	Home / Navigation	Verify promotional banners and their call-to-action links open the correct content.	Low
SC016	REQ004	Product Listing	Verify product cards display the correct product image, name and price.	High
SC017	REQ004	Product Listing	Verify selecting a product opens the correct product details page.	High
SC018	REQ004	Product Listing	Verify out-of-stock products are clearly identified and cannot be purchased.	High
SC019	REQ004	Product Listing	Verify products can be sorted by price in ascending or descending order.	Medium
SC020	REQ004	Product Listing	Verify category filters display only products belonging to the selected category.	Medium
SC021	REQ005	Product Search	Verify searching for an existing product displays relevant matching results.	High
SC022	REQ005	Product Search	Verify product search supports partial product names.	Medium
SC023	REQ005	Product Search	Verify an appropriate no-results message appears for a product that does not exist.	Medium
SC024	REQ005	Product Search	Verify the search function handles an empty search input appropriately.	Low
SC025	REQ006	Shopping Cart	Verify a customer can add an available product to the shopping cart.	Critical
SC026	REQ006	Shopping Cart	Verify adding the same product again updates the quantity and price correctly.	High

Scenario ID	Requirement ID	Module Name	Test Scenario Description	Priority
SC027	REQ006	Shopping Cart	Verify the cart displays the correct products, quantities and prices.	High
SC028	REQ006	Shopping Cart	Verify changing a product quantity updates the subtotal correctly.	High
SC029	REQ006	Shopping Cart	Verify a customer can remove a product from the shopping cart.	High
SC030	REQ006	Shopping Cart	Verify checkout is prevented when the shopping cart is empty.	High
SC031	REQ006	Shopping Cart	Verify subtotal, discount, shipping charges and grand total are calculated correctly.	Critical
SC032	REQ006	Shopping Cart	Verify cart contents remain available when navigating between website pages.	Medium
SC033	REQ007	Wishlist	Verify a logged-in customer can add a product to the wishlist.	Medium
SC034	REQ007	Wishlist	Verify a customer can remove a product from the wishlist.	Low
SC035	REQ008	Checkout / Address	Verify checkout proceeds when valid shipping address details are entered.	Critical
SC036	REQ008	Checkout / Address	Verify validation appears when mandatory shipping address fields are missing.	High
SC037	REQ008	Checkout / Address	Verify invalid postal code input is handled with an appropriate validation message.	Medium
SC038	REQ008	Checkout / Address	Verify a customer can edit the shipping address before placing an order.	Medium
SC039	REQ008	Checkout / Address	Verify the checkout order summary matches the cart items, quantities and delivery details.	Critical
SC040	REQ009	Payment	Verify payment completes successfully using approved test payment details.	Critical
SC041	REQ009	Payment	Verify payment failure is handled clearly and the order is not incorrectly marked as paid.	Critical
SC042	REQ009	Payment	Verify repeated Place Order clicks do not create duplicate orders.	High
SC043	REQ009	Payment	Verify cancelling a payment returns the customer safely to the shopping flow.	Medium
SC044	REQ010	Order Management	Verify a successful purchase creates an order with a unique order number.	Critical
SC045	REQ010	Order Management	Verify a logged-in customer can view their order history.	High
SC046	REQ010	Order Management	Verify order details display the correct products, amount, date and order status.	High
SC047	REQ010	Order Management	Verify an eligible order can be cancelled and its status is updated correctly.	Medium
SC048	REQ011	Customer Profile	Verify a logged-in customer can view their profile details.	Medium
SC049	REQ011	Customer Profile	Verify a customer can update profile details using valid information.	Medium
SC050	REQ011	Customer Profile	Verify invalid profile information is rejected with a validation message.	Medium
SC051	REQ012	Logout / Session	Verify a logged-in customer can log out successfully.	High
SC052	REQ012	Logout / Session	Verify protected pages cannot be accessed after the customer logs out.	High
SC053	REQ012	Logout / Session	Verify the website handles an expired session securely and prompts the customer to log in again.	Medium
